

Engels et al., 2006 - Figure 2 - ABM survey area with bathymetry, survey track (in black), and the schematic orientations of mapped seafloor glaciogenic features within each study area. Heavy black lines indicate the presence and orientation of flutes, red lines indicate the mean orientations of iceberg scours or grooves. The bathymetry data are a combination of gridded data from IBCAO [*Jakobsson et al.,* 2000] and swath data collected by the *USCGC HEALY, R/V Nathaniel B. Palmer* and the *USS Hawkbill* [*Edwards and Coakley,* 2003*; Edwards et al.,* 2005]. Bathymetry is displayed as color-coded contours overlaid on a sun-shaded digital terrain model illuminated from the east.
