Dive Results/Remarks: Landed at 1150'. Travelled North through corals on hard bottom. Collected mushroom corals and sea pens along the way. Collected black and gold corals near north end of bed. At 1130 the current was strong so I turned to the south, looking for a chalky white bush to cover our specimens. By 1215 the current was too strong to maneuver against - we left the bottom - Normal Recovery

Equipment Deficiencies: CTD recorder inop.
