Dive Results/Remarks: Landed near end of outfall.  
Brought dome #1 to the surface. Returned to  
the end of the outfall - brought plexiglass box  
to the surface. Had difficulty locating third  
dome using pingerlocator. Finally found it while  
tracking back toward the end of the pipe.  
Brought dome #2 to the surface. Went  
to middle dome #3 - brought it up. Returned  
and put #2 in middle position. Surfaced  
for #3 - could not locate 12 kHz pinger  
at end position so put #3 next to #2.
