Scientific Data Acquired : Prepare an abstract outlining your objectives, techniques, findings, etc.

The object of this dive was to conduct transects of deepwater shrimp grounds to observe behavior of shrimp, and predators in both natural habitat and at a baited trap.

The findings were as follows. Plesionika were in the water column above the bottom, not on the bottom as expected. Heterocarpus ensifer were much deeper during day than trapping indicated. We observed numerous species of fishes which were not caught in our traps. Estimated densities for H. ensifer and H. laevigatus were at one per 10 square meters and one per 100 square meters respectively.
