HAWAI'I UNDERSEA RESEARCH LABORATORY QUICK LOOK REPORT DIVE: RCV-223

MISSION STATUS

Location: French Frigate Shoals, NWHI

Latitude: 23°53.3880 **Longitude:** 165°24.0060

Mission Date: 9/10/2003 Duration: 3 h 00 min

Maximum Depth: 427 m

Project Title: Characterization of deepwater fish and precious corals on the seamounts

neighboring Hawaii's most remote monk seal colonies.

Principal Investigator: Frank Parrish

Address: Pacific Island Fisheries Science Center

2570 Dole Street

Honolulu, Hawaii 96822

Phone: 808-983-5391

Observer 1: Frank Parrish **Observer 2:** Raymond Boland

Address: Same as above Address: Same as above

Pilot 1: Dan Greeson, Steve Tottori **Pilot 2:** Mark Drewery

Scientific Data Acquired: Prepare an abstract outlining your objectives, techniques, findings, etc.

Objectives:

The dive began at 426 m. The entire dive was a transect for fish. The transect was broken into 5 minute duration bins, with depth, bottom features, coral and fish species recorded. Dive ended at 376 meters after 180 minutes.

Dive started on sand field, moved through sand field with Basalt rock. A Carbonate Hard Pan was next with Crags. This developed into a Basalt bottom that slowly rose to 375 m. Early in the dive there were large numbers of fish which reaked in the Carbonate Hard Pan Crags. As the bottom rose, fish species and density numbers dropped. Soft corals, Cirripathes, Leopathes and other soft coral numbers increased on Basalt rock.

Species List:

Please mark whether -single; -few (2-10); -many (11-100); -abundant (>100) (e.g., Symphysanodon maunaloae-many)

Chlorupthalamus-abundant
Symphasanadon maunaloa-abundant
Setarches spmany
Ventrifossa spmany
Laemonema rhadicir-many
Polymixia japonica-many
Media abysillis-few
Chaunix umbriuus-few
Satyrichthyes-few
Beryx spmany
Antigonia-single

MISSION EVALUATION:

Limitations, failures, or operational problems noted:

No problems were encountered.

Recommendations for corrective action or improvement:

In your opinion, did the mission essentially achieve its purpose? Compare actual work accomplished with the work that was expected to be accomplished.

All goals expected were achieved.

List specimens or samples collected on the mission.

No samples taken

DATA RELEASE

Data may be retained by the project leader for up to 2 years after the mission date with the following exception. NOAA may request to use photos for publication or publicity purposes at any time.

Fill in the appropriate statement below and sign this form.
