Tide Tool Version v10.58, November 2017							
This version is for the Windows 7 & 10 (64-bit) operating system. Simple scripts are also provided for data download using "wget" through the internet, but this method is not recommended as the primary data retrieval method because timely, complete delivery of all data packets cannot be guaranteed. The "wget" method should be considered 'non-operational' if a standard commercial internet service is utilized since connection reliability and timeliness, especially during tsunami emergencies, cannot be guaranteed.
